

# How to order a FeNO on a patient

## **The patient is on K17**

- Query Ebony Richardson (or another designated K17 staff member who can perform FeNO testing) to see if the patient can have the FeNO test prior to discharge from the clinic.
- If the patient can be accommodated the same day as the clinic visit, the test will be completed in their examination room. The individual performing the test will notify the provider(s) of the result
- If the patient cannot be accommodated the same day as the clinic visit, the patient will to return in the near future to perform the FeNO test. Please understand that the clinic team will have to prioritize patient throughput vs. performing FeNO testing.
- If a FeNO is desired at the patient follow-up visit, please indicate this on the discharge sheet sent to the front desk. The front desk personnel can note this, and it will alert the clinic staff at the follow-up visit.
- The ORDERING PROVIDER will need to complete the charge capture/billing process as outlined below

## **The patient is on K17 and cannot be accommodated on the day of their visit -OR- the patient is seen in a clinic outside of the HFH-Detroit Facility**

- Send Ebony Richardson (or another designated K17 staff member who can perform FeNO testing) an email about your patient (Name, MRN) to schedule for a K17 nurses visit for FeNO testing. Please include the name of the staff (and fellow, if applicable) in this communication.
- The test will be ordered under the K17 OPD rounder at this time. This is subject to change in the future.
- The test performer (and not the provider) will perform the test AND the charge capture/billing process under the K17 OPD rounder's billing designation
- A note in Epic with the result will be generated and it will be routed to the ORDERING provider(s)

## **BILLING**

The CPT code for billing for this procedure in Epic is: 95012

To bill for this testing:

The charge capture code for this is: 924000012

HB NITRIC OXIDE EXP GAS DETERMINATION

**Please note:** The provider bills for this test (similar to smoking cessation counseling; found in the “Wrap up -> Charge Capture” section) while the clinic team conducts the testing.
